BPTC Key Statistics 2019

An analysis of students over three academic years

Executive Summary

Demographics

- **Overall enrolment:** 1619 students enrolled on the BPTC in 2017/18: an increase of 196 students compared to 2016/17, and the largest year on year increase in enrolment since the BPTC started in 2011. Of the 2017/18 enrolled students, 1445 were full-time and 174 were part-time on the course. The number of part-time students was down year on year and has shown a downward trend since 2011 when 255 part-time students enrolled on the course.
- **Domicile:** Most of the increase in enrolment for 2017/18 was from students domiciled outside the UK or EU (overseas students). In 2016/17, 614 overseas domiciled students enrolled on the BPTC; for 2017/18 the figure increased by 152 to 766. Overseas students represented almost half of all students enrolling in 2017/18, compared to 43 per cent of students in 2016/17 and a third of all students when the BPTC started in 2011/12.
- **Gender:** The percentage of female BPTC students has increased from 52 per cent in 2011/12, to 53 per cent in 2015/16, to just over 56 per cent in 2016/17 and 2017/18 (56 per cent for overseas students, and 57 per cent for UK/EU students).
- **Ethnicity:** There was a slight increase in the percentage of UK/EU domiciled Black, Asian and Minority Ethnic (BAME) students on the BPTC in comparison to white UK/EU domiciled students for 2017/18. Around 37 per cent of UK/EU students who enrolled in 2017/18 and who provided information on ethnicity were from a BAME background. This was up by around three percentage points compared to 2016/17, one percentage point compared to 2015/16, and around six percentage points higher than that seen from 2012/13 to 2014/15. The majority of 2017/18 overseas domiciled students were from an Asian background (around 86 per cent of overseas domiciled students).

- **Disability:** Around 15 per cent of UK/EU domiciled students who enrolled on the BPTC in 2017/18 had declared a disability. This was similar to that seen in 2016/17 and around four percentage points greater than the figure for 2015/16. Around four per cent of overseas domiciled students who enrolled in 2017/18 declared a disability.
- **First degree classification:** Around 31 per cent of UK/EU domiciled students who provided information on degree classification and enrolled on the BPTC in 2017/18 had gained a first-class degree; 54 per cent of them had gained an upper-second class degree; 11 per cent had gained a lower-second class degree, and around four per cent had another degree classification. The proportion of UK/EU students with a first-class degree enrolling on the BPTC has increased year on year since 2011 (from around 20%), and the proportion with a lower second class degree has decreased year on year over the same period (from around 16%).

BPTC outcomes

- **Overseas students:** Just under two thirds of full-time overseas domiciled students that enrolled in 2017/18 had passed the course as of January 2019; with the remaining mostly yet to complete the course. For 2016/17 enrolled students (including part-time), around 80 per cent had passed the course, 10 per cent were yet to complete it, and around 7 per cent had failed it.
- The percentage of overseas domiciled students failing or yet to complete the BPTC declined for 2016/17 students compared to previous years, which may be due to allowing students one more additional re-sit at assessments from 2016/17 onwards.
- **UK/EU students:** Just over 75 per cent of full-time UK/EU domiciled students that enrolled in 2017/18 had passed the BPTC as of January 2019; with the remaining mostly yet to complete the course. Around 12 per cent received an Outstanding overall grade, around 53 per cent received a Very Competent, and around 11 per cent received a Competent overall.

- For 2016/17 enrolled students (including part-time), just under 80 per cent had passed the course, just under 12 per cent were yet to complete it, and around 5 per cent had failed the course; an additional 4 per cent had withdrawn from the BPTC.
- In line with that seen for overseas domiciled students, the percentage of UK/EU students who enrolled in 2016/17 who had failed the course as of January 2019 appears to be down in comparison to previous years.

Pupillage – as of March 2019

- Overall, around 41 per cent of UK/EU domiciled BPTC graduates who enrolled on the course from 2013/14-2017/18 (2013-2017) had commenced pupillage. The relevant figure increases to around 45 per cent when looking at those enrolled from 2013-2016 only, as it can take a while for more recent graduates to gain pupillage. The likelihood of gaining pupillage varies widely by degree class and BPTC overall grade in particular, with ethnicity and first degree institution also appearing to be possible influencing factors.
- Those with an Outstanding overall BPTC grade were the most likely to have commenced pupillage. Around 83 per cent of such graduates with a first-class degree and 73 per cent with an upper-second class degree had commenced pupillage. For those with a Very Competent overall grade on the BPTC, around half of them with a first-class degree, 40 per cent of them with an upper-second class degree, and around 18.5 per cent of them with a lower-second class degree had commenced pupillage. The rates for those gaining a Competent overall grade on the course were far lower (11 per cent or less for all degree classifications).
- **Domicile:** The clear majority of those who have gone on to commence pupillage following the BPTC are UK/EU domiciled students. 1339 out of the 1374 BPTC graduates (just over 97%) from 2013-2017 cohorts that gained pupillage had UK/EU domiciled status when on the course.
- **Gender:** Around 53 per cent of all UK/EU BPTC graduates enrolled from 2013-2017 were female, and 47 per cent were male. In comparison, of those from this cohort that went on to commence pupillage, around 51 per cent were female, and around 49 per cent were male. Males with a first-class degree and males with a second-class degree appeared to be slightly more likely than females to gain pupillage when controlling for BPTC grade. The opposite was seen for those with an upper-second class degree.
- **Ethnicity:** When controlling for first degree class and BPTC grade, UK/EU BPTC graduates from BAME backgrounds who enrolled on the course from 2013-2017 were less likely to have commenced pupillage than those from white backgrounds. For example, of UK/EU domiciled BPTC graduates with an upper-second class degree and Very Competent overall BPTC grade, 44 per cent of them from white backgrounds had commenced pupillage, compared to around 23 per cent of the BAME cohort with the same degree class.
- **Disability:** Overall there appears to be no obvious trend in gaining pupillage for those with a declared disability in comparison to those without a declared disability.
- **First degree institution:** When controlling for BPTC overall grade and first-degree classification, those who attended universities classified in the Top 10 in the UK according to The Times and Sunday Times Good University Guide, were more likely to have commenced pupillage compared to attendees of universities classified in the next forty; who were in turn more likely to have commenced pupillage than those attending other universities. For example, around 42 per cent of those with a first class degree and a Very Competent overall grade on the BPTC, who also went to a university classified as being in the 11-50 best in the UK had commenced pupillage; in comparison to 50 per cent of those with an upper second class degree and Very Competent overall grade who went to a university classified in the top 10 had commenced pupillage.

Introduction to the BPTC Key Statistics report

This report provides key statistics relating to students enrolled on the Bar Professional Training Course (BPTC), which is the current vocational stage of training for the Bar. The BPTC is delivered at a number of universities across England and Wales, and the data in this report reflect data submitted to the Bar Standards Board by these BPTC providers as at February 2019.

The BPTC is delivered in a range of ways:

- full-time over one academic year or part-time over two academic years;
- as a stand-alone qualification or integrated with a qualifying law degree (as offered by the University of Northumbria at Newcastle).

From September 2020, the BPTC will no longer exist in its current format as it will be replaced by a number of courses that form part of one of the four future pathways permitted by the Bar Standards Board. Details about the BPTC and training to become a barrister in England and Wales, including details on the future of training for the Bar can be found on our [website](#).

This report is divided into four parts:

- Part 1** Key statistics aggregated for all providers (full-time and part-time BPTC students);
- Part 2** Key statistics by provider (full-time BPTC students);
- Part 3** Key statistics by provider (part-time BPTC students);
- Part 4** BPTC graduate progression statistics - both aggregated and by provider (full-time and part-time BPTC students).

The BPTC cohorts included in Parts 1-3 are as follows:

- 2015/16, 2016/17, 2017/18 full-time students;
- 2015/17, 2016/18, 2017/19 part-time students, with data on student demographics only for those in the 2017/19 cohort, as results are not yet available for this cohort.

In Part 4 the 2013/14 and 2014/15 full-time and 2013/15 and 2014/16 part-time cohorts are also included in order to give a more detailed picture of statistics on pupillage for those who have graduated from the BPTC.

Important notes regarding data use and interpretation

From 2016/17 the rules on the number of re-sits allowed per student for each module on the BPTC changed. Previously students were only allowed one re-sit per module, but from 2016/17 students have been allowed two. This means as of the time the data for this report were collected, there had not been enough sittings for it to be possible for any 2017/18 students to fail the entire course via failing exam sittings. This affects the comparison between years for the charts on BPTC outcomes.

Please take into consideration the difficulty in comparing data between years; the data refer to cohorts enrolled at different points in time and this affects the proportion of students yet to complete the BPTC and the relative proportions of those achieving each overall grade, withdrawing from, or failing the BPTC, as well as the amount of time those that have passed the course have had in which to gain pupillage.

It should also be noted that it is worthwhile to refer to the x-axis of the charts representing student numbers in order to get a better context of the size of the population being represented.

Please also take into consideration the difficulty in drawing inferences from these data, as there are many factors involved in determining student success on the BPTC as well as progression onto first six pupillage following completion of the course.

Owing to a discrepancy in the data, throughout the report the domicile data used for 2017 enrolled students at BPP institutions are that which was provided to us by students when taking the BCAT.

Data presentation

The data in the main body of the report (Parts 1-4) are presented in charts with most measures indicating both numbers and percentages of BPTC students. Providing both helps to illustrate population size and give greater context to the percentages displayed.

The raw data can be found in the appendices in an anonymised form, in compliance with the anonymisation code of practice outlined below. In the appendices, where we do not have data (either because the provider did not collect the data or the student did not provide the data) we have used the words "Not provided". However, in the charts, we have not included individuals where data on one or more characteristics have not been provided, as including it would lead to greater difficulty in making direct comparisons between groups.

In this report "Not yet complete" means the student has either not taken all the assessments, not passed all the assessments, deferred one or more assessments to a future year, or been permitted to suspend their studies and resume at a specified point. Students who have withdrawn from the course have not completed all the assessments and therefore have no overall grade; in some cases, these students may re-enrol. A student who has failed the BPTC may re-enrol to take the entire course again. In cases where charts relate to students domiciled in the UK/EU or overseas only, this refers to the region in which the student was domiciled prior to enrolment on the BPTC. The domicile codes used in the aggregation of the data are taken from the Higher Education Statistics Agency (HESA). The terminology used in chart titles regarding domicile is as follows:

- UK/EU domiciled students;
- Overseas domiciled students;
- Students from all domiciles.

Regarding changes to this report, Chart 2.A.6.2 has been taken out this year, owing to small numbers of UK/EU students with a lower second class degree at the majority of BPTC providers; a data table for enrolment for part-time students has been included in Appendix II, and Charts 2.B.4.1-3 have been aggregated into one chart.

Data sources

The data in the report were collected from:

- individual BPTC providers;
- the BPTC online applications system, BarSAS, and
- pupillage registration data from our database.

Validation has been carried out on returned data based on comparisons against data already held by the Bar Standards Board and by asking BPTC providers to verify the information that was provided.

We have taken considerable care and attention in the compilation of the data provided to us and we have sought to provide a purely objective presentation of the data. Missing data and/or new information received may affect the representation of the data presented in this report and efforts will be made to incorporate any such data in future reports. Despite our best efforts and quality control procedures, mistakes can happen. When they do, corrections will be made in a timely manner, announced and clearly explained to users.

Data protection and confidentiality

We take our responsibilities for data protection very seriously and have made every attempt to make sure that individual students cannot be identified from the data included in this publication. We have adhered to the *Anonymisation: managing data protection risk code of practice* report from the Information Commissioner's Office, (November 2012) and applied anonymisation techniques where appropriate.

An outline of the anonymisation process is given in Appendix II.

The data in this report were compiled by staff of the Bar Standards Board. Providers were given the opportunity to validate the data that they had submitted.

Acknowledgements

We are grateful to BPTC providers for their cooperation in providing the majority of data used in this report.

As of when these data were collected, students who enrolled in 2017/18 who undertook a re-sit and did not pass would be yet to undertake their third sit, meaning these students could not have yet failed the course.
3. The above does not include data on individuals where data on outcomes and/or one or more characteristics have not been provided.

BPTC Key Statistics 2019

Part 4: BPTC graduate progression statistics

Part 4: BPTC graduate progression statistics: both aggregated and by provider (full-time and part-time BPTC students)

The charts in Part 4 are based on first six pupillages commencing between 1 October 2013 and 31 March 2019 inclusive. Graduates in the cohorts covered by this report who have secured pupillage since 31 March 2019 will be included in the next publication.

Students may start pupillage up to five years after successfully completing the BPTC. These charts do not include pupils who either passed the BPTC prior to 2014 or who took another route to qualifying as a barrister in England and Wales, for example by virtue of having passed the Bar Transfer Test.

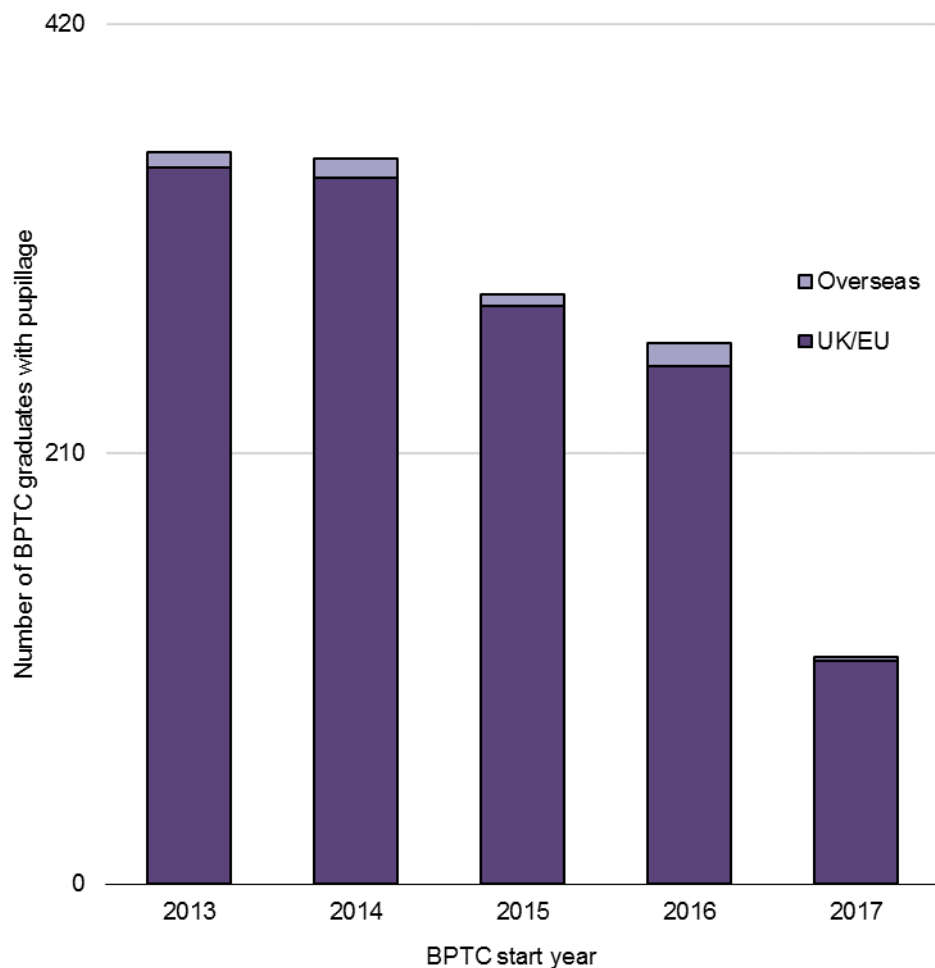

Full details of overall pupillage rates (including those who took alternative routes to pupillage) can be found at:
<https://www.barstandardsboard.org.uk/media-centre/research-and-statistics/statistics/pupillage-statistics/>

Not all students taking the BPTC will wish to undertake pupillage, or wish to remain to practise in the UK. There are relatively few overseas domiciled BPTC graduates that have gained pupillage in the UK following completion of the course, and for this reason, the majority of the charts in Part 4 contain data on UK/EU domiciled BPTC graduates only. Of the BPTC graduates enrolling in the academic years commencing 2013-2017, 35 BPTC graduates who were domiciled overseas prior to enrolling on the course gained first six pupillage in comparison to 1339 UK/EU domiciled BPTC graduates.

3. In the absence of data on the date of award for completion of the BPTC, if a student passed the BPTC at first attempt, the length of time between completion of the BPTC and the commencement of pupillage was calculated from 31 July in the year of graduation. Notes

1. The chart above shows the number and percentage of students who successfully completed the BPTC during the report period and who commenced first six pupillage between 1 October 2013 and 31 March 2019 following graduation.
2. Many students are domiciled outside the United Kingdom and do not intend to practise in England and Wales upon completion of the BPTC.

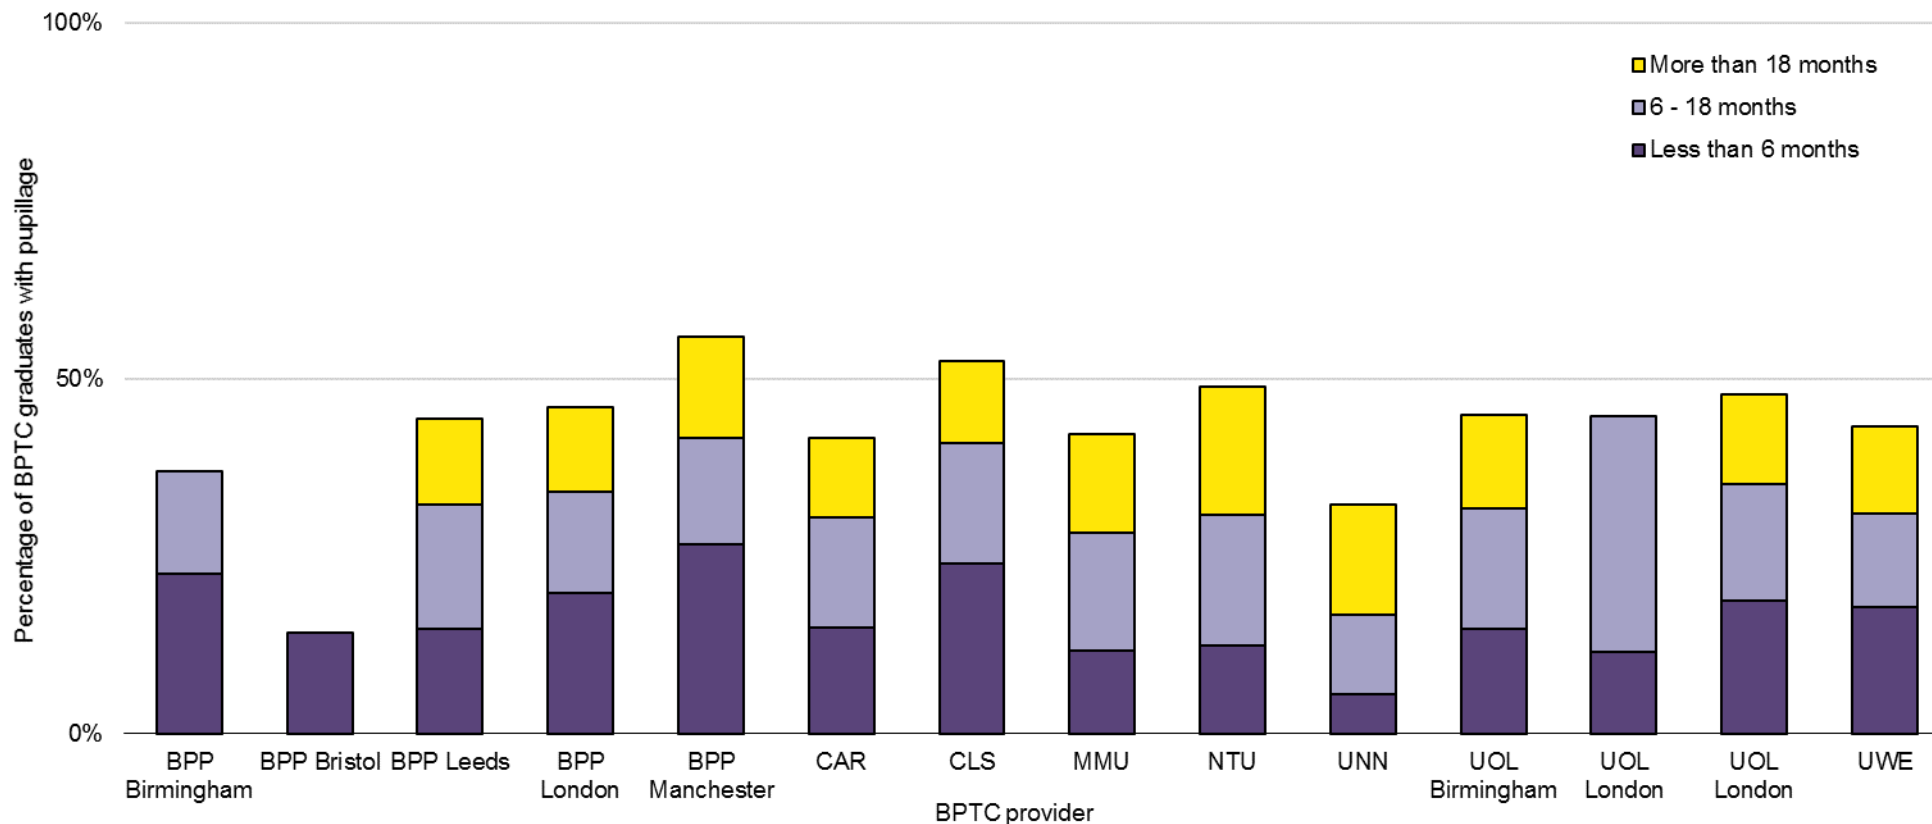

4. B. 2. Pupillage rate of BPTC graduates, by provider: UK/EU domiciled students

Notes

1. The chart above shows the percentage of students who successfully completed the BPTC during the report period and who commenced first six pupillage between 1 October 2013 and 31 March 2019 following graduation. They are categorised by the length of time passed following completion of the BPTC and commencement of first six pupillage.
2. The “Less than 6 months” category is an aggregation of all cohorts (2013-2017). “6 -18 months” refers to students commencing the BPTC 2013-2016 only, and “More than 18 months” refers to students commencing the BPTC in 2013-2015 only. Application for pupillage can be made before commencing the BPTC.
3. In the absence of data on the date of award for completion of the BPTC, if a student passed the BPTC at first attempt, the length of time between completion of the BPTC and the commencement of pupillage was calculated from 31 July in the year of graduation. The period was calculated for other students from 31 October in the year of graduation.
4. Data for students at several providers are not represented in the above owing to a small number of graduates by year (<20).

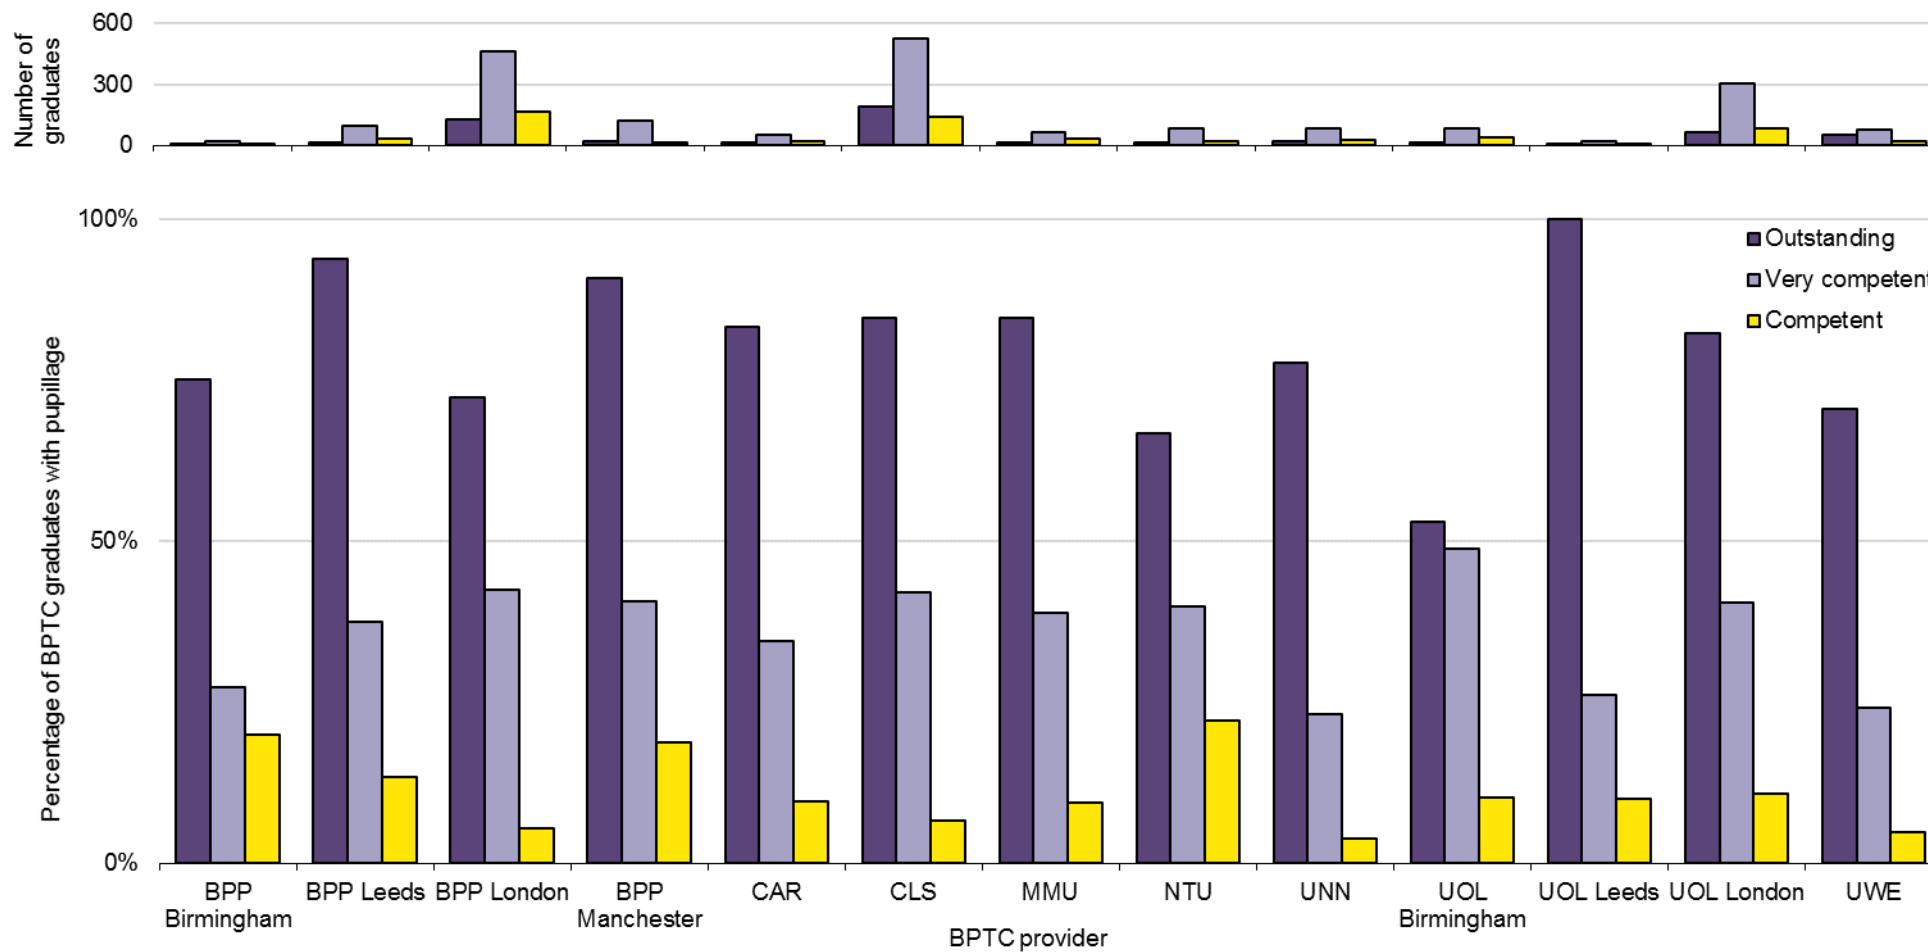

4. B. 3. BPTC graduates commencing pupillage within 6 months, 6 - 18 months, and over 18 months following completion of the BPTC: UK/EU domiciled graduates

Notes

1. The chart above highlights the percentage of students who successfully completed the BPTC during the report period and who commenced first six pupillage between 1 October 2013 and 31 March 2019 following graduation. Appendix I: Anonymisation process

To protect the identity of individual students, data have been anonymised in line with recommendations and guidelines laid out in 'Anonymisation: managing data protection risk code of practice' (Information Commissioner's Office, November 2012).

A combination of the following anonymisation techniques have been carried out in order to prevent single individuals being identified from the data in the charts:

- y-axes in all instances only contain three values, in order to make it more difficult to ascertain student numbers and percentages for each chart element;
- some of the data have been aggregated, particularly sensitive demographic data and instances of small cohorts;
- as part-time cohorts are significantly smaller than full-time cohorts the number of charts have been cut down significantly and only one data table has been provided;
- by anonymising the data in parts 1-3, we have been able to leave some of the data intact in part 4 (the anonymisation of demographic data in the earlier parts of the report means that it is not possible to identify individuals in part 4 with any degree of accuracy);
- in the data tables found in the appendices, values have been banded automatically if they are fewer than 5 (< 5 is displayed), and fewer than 10 (< 10 is displayed);
- in a column, if only one value fewer than five or fewer than ten is present, then the next lowest value is banded to the next multiple of five, e.g. 110 becomes < 115, and 21 becomes < 25;
- totals in the data tables are not provided in most cases, particularly for individual providers;
- percentages are not provided in the data tables.

We have decided not to include in any graphs on student outcomes (Parts 1A, 2A, 3A, 4A and 4B) in instances where there are fewer than 20 students in each overall cohort. For example, if the number of students from a certain provider with a first class degree is fewer than 20, it has not been included in the relevant chart.

This is to ensure greater validity in the data presented, as smaller cohorts are more likely to be affected by outliers in terms of student outcomes and can lead to misinterpretation of the data. This means that in many cases, data on individual providers are not found in a chart.

Appendix II – Anonymised data tables

The years in the table heading throughout Appendix II refer to year of enrolment on the course. The figures for 2017 for Part 1.A.2 to Part 1.A.9 refer to full-time students on the course only, as part-time students enrolled in 2017 would not yet have been able to complete the course at the time of data collection.
