

# **BPTC Key Statistics 2018**

## **An analysis of students over three academic years**

## Introduction to the BPTC Key Statistics report

This report provides key statistics relating to students enrolled on the Bar Professional Training Course (BPTC), which is the vocational stage of training for the Bar. The BPTC is delivered at a number of universities across England and Wales, and the data in this report reflect data submitted to the Bar Standards Board by these BPTC providers as at January 2018.

The BPTC is delivered in a range of ways:

- full-time over one academic year or part-time over two academic years;
- as a stand-alone qualification or integrated with a qualifying law degree (as offered by the University of Northumbria at Newcastle).

You can find more details about the BPTC on our [website](#).

This report is divided into four parts:

- Part 1** Key statistics aggregated for all providers (full-time and part-time BPTC students);
- Part 2** Key statistics by provider (full-time BPTC students);
- Part 3** Key statistics by provider (part-time BPTC students);
- Part 4** BPTC graduate progression statistics - both aggregated and by provider (full-time and part-time BPTC students).

The BPTC cohorts included in Parts 1-3 are as follows:

- 2014/15, 2015/16, 2016/17 full-time students;
- 2014/16, 2015/17, 2016/18 part-time students, with data on student demographics only for those in the 2016/18 cohort, as results are not yet available for this cohort.

In Part 4 the 2012/13 and 2013/14 full-time and 2012/14 and 2013/15 part-time cohorts are also included in order to give a more detailed picture of statistics on pupillage for those who have graduated from the BPTC.

## Important notes regarding data use and interpretation

From 2016/17 the rules on the number of re-sits allowed per student for each module on the BPTC changed. Previously students were only allowed one re-sit per module, but from 2016/17 students have been allowed two. This means as of the time the data for this report were collected, there had not been enough sittings for it to be possible for any 2016/17 students to fail the course. This affects the comparison between years for the charts on BPTC outcomes.

Please take into consideration the difficulty in comparing data between years; the data refer to cohorts enrolled at different points in time and this affects the proportion of students yet to complete the BPTC and the relative proportions of those achieving each overall grade, withdrawing from, or failing the BPTC, as well as the amount of time those that have passed the course have had in which to gain pupillage.

It should also be noted that it is worthwhile to refer to the x-axis of the charts representing student numbers in order to get a better context of the size of the population being represented.

Please also take into consideration the difficulty in drawing inferences from these data, as there are many factors involved in determining student success on the BPTC as well as progression onto first six pupillage following completion of the course.

## Data presentation

The data in the main body of the report (Parts 1-4) are presented in charts with most measures indicating both numbers and percentages of BPTC students. Providing both helps to illustrate population size and give greater context to the percentages displayed.

The raw data can be found in the appendices in an anonymised form, in compliance with the anonymisation code of practice outlined below. In the appendices, where we do not have data (either because the provider did not collect the data or the student did not provide the data) we have used the words “Not provided”. However, in the charts, we have not represented instances where data on one or more characteristics have not been provided, as including it would lead to greater difficulty in making direct comparisons between groups.

In this report “Not yet complete” means the student has either not taken all the assessments, not passed all the assessments, deferred one or more assessments to a future year, or been permitted to suspend their studies and resume at a specified point. Students who have withdrawn from the course have not completed all the assessments and therefore have no overall grade; in some cases, these students may re-enrol. A student who has failed the BPTC may re-enrol to take the entire course again. In cases where charts relate to students domiciled in the UK/EU or overseas only, this refers to the region in which the student was domiciled prior to enrolment on the BPTC. The domicile codes used in the aggregation of the data are taken from the Higher Education Statistics Agency (HESA). The terminology used in chart titles regarding domicile is as follows:

- UK/EU domiciled students;
- Overseas domiciled students;
- Students from all domiciles.

Regarding changes to this report, Chart 2.A.6.2 has been taken out this year, owing to small numbers of UK/EU students with a lower second class degree at the majority of BPTC providers; a data table for enrolment for part-time students has been included in Appendix II, and Charts 2.B.4.1-3 have been aggregated into one chart.

## Data sources

The data in the report were collected from:

- individual BPTC providers;
- the BPTC online applications systems Milkround (in use up to and including 2014 admissions) and BarSAS (the current system), and
- pupillage registration data from our database.

Validation has been carried out on returned data based on comparisons against data already held by the Bar Standards Board and by asking BPTC providers to verify the information that was provided.

We have given considerable care and attention to the compilation of the data provided to us and we have sought to provide a purely objective presentation of the data. Missing data and/or new information received may affect the representation of the data presented in this report and efforts will be made to incorporate any such data in future reports. Despite our best efforts and quality control procedures, mistakes can happen. When they do, corrections will be made in a timely manner, announced and clearly explained to users.

## Data protection and confidentiality

We take our responsibilities for data protection very seriously and have made every attempt to make sure that individual students cannot be identified from the data included in this publication. We have adhered to the *Anonymisation: managing data protection risk code of practice* report from the Information Commissioner's Office, (November 2012) and applied anonymisation techniques where appropriate.

An outline of the anonymisation process is given in Appendix II.

The data in this report were compiled by staff of the Bar Standards Board. Providers were given the opportunity to validate the data that they had submitted.

## Acknowledgements

We are grateful to BPTC providers for their cooperation in providing the majority of data used in this report.

## Part 1: Key statistics aggregated for all providers (full-time and part-time BPTC students)

### 1. A. BPTC results and outcomes for full-time and part-time students

1. A. sets out an overview of the results and outcomes obtained by full-time and part-time students enrolled on the BPTC.

#### 1. A. 1. BPTC applications and enrolments: students from all domiciles

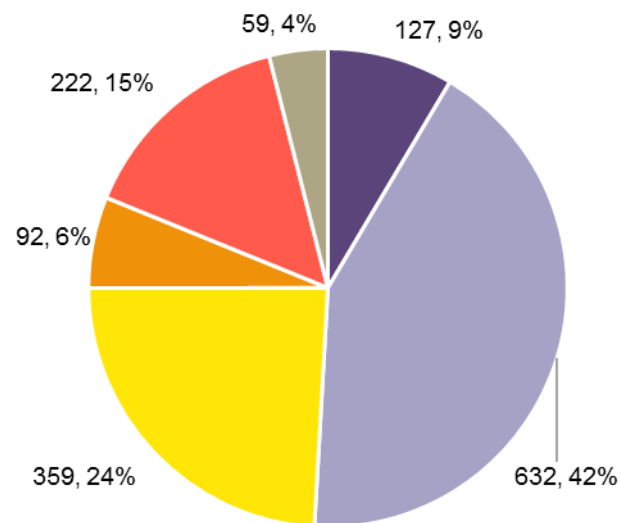

#### Notes

1. The number of applications for 2014/15 has been sourced from the previous online applications system (Milkround). From 2015/16 there is a different system in use: BarSAS. It is possible that this is responsible for the increase in course applications, if applications are recorded using a different methodology.
2. The number of enrolments are those reported and validated by providers in the collection of key statistics.
3. The data above cover part-time and full-time students enrolled in October 2014, 2015 and 2016.
4. Enrolment numbers for previous years may differ from previous publications, as updated information is received from providers of the BPTC.

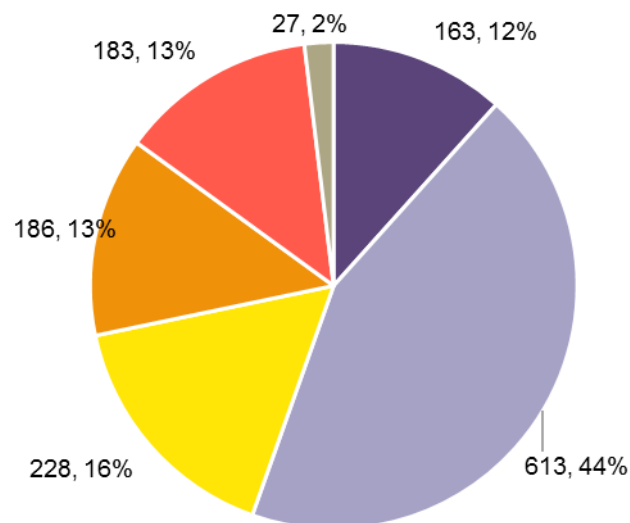

### 1. A. 2. BPTC results obtained by students: students from all domiciles

The following charts show the percentage of enrolled students in a particular year who obtained the overall grade outcomes of Outstanding/Very Competent/Competent or the non-grade outcomes of Not Yet Complete/Fail/Withdrawn. A detailed description of the criteria for each grade (including the percentages assigned to the pass grades) can be found in the [BPTC Handbook](#).

#### Notes

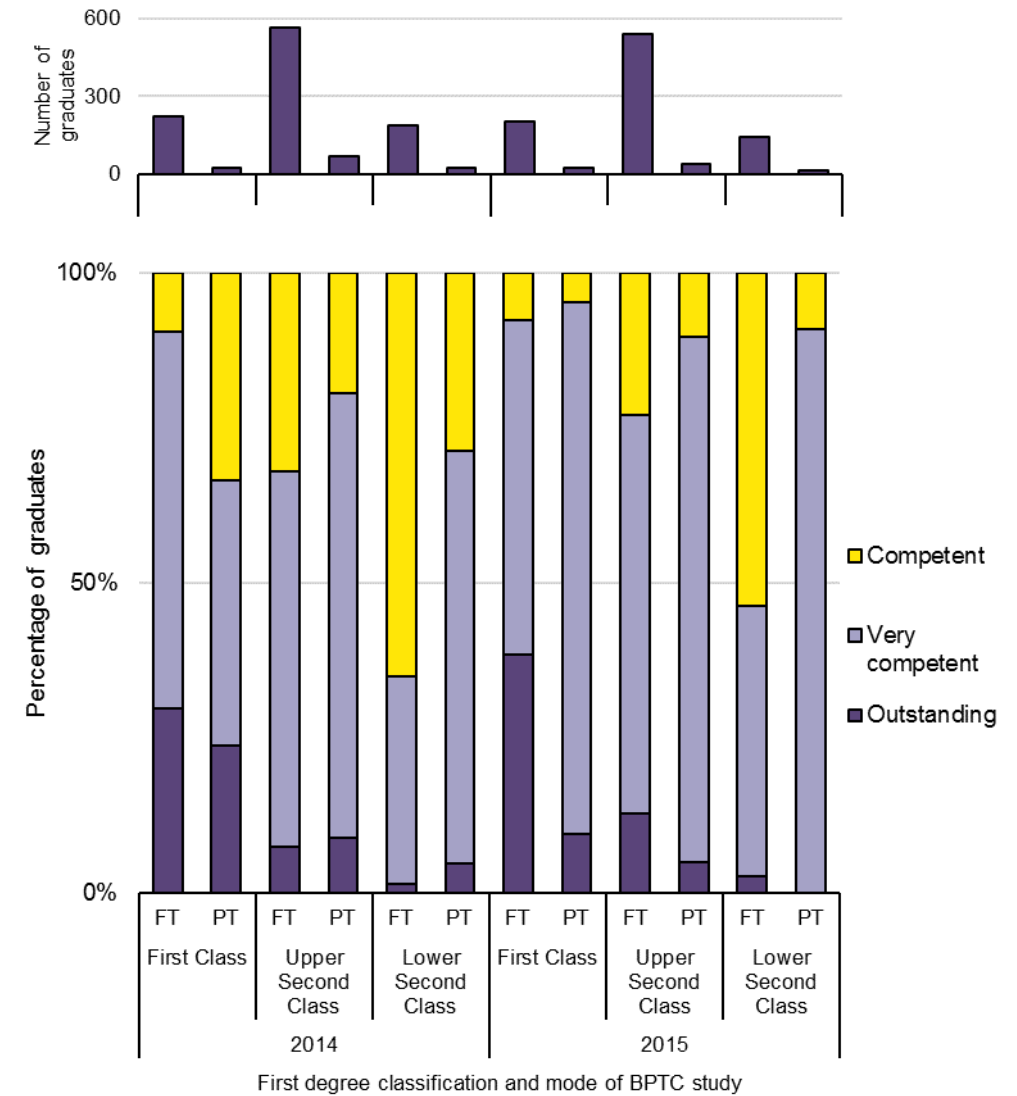

- The data above cover the following cohorts: 2014-15 full-time, 2015-16 full-time, 2016-17 full-time, 2014-16 part-time and 2015-17 part-time.
- Up until 2016/17, a student who failed an assessment was usually permitted one further opportunity to re-take the failed assessment). From 2016/17 this was changed to two further opportunities. As of when this data was collected, students who enrolled in 2016/17 who undertook a re-sit and did not pass would be yet to undertake their second re-sit, meaning these students could not have yet failed the course.

From 2016/17 this was changed to two further opportunities. Information on failure and re-assessment is contained in the BPTC Handbook.

## **Part 4: BPTC graduate progression statistics: both aggregated and by provider (full-time and part-time BPTC students)**

The charts in Part 4 are based on first six pupillages commencing between 1 October 2012 and 31 March 2018 inclusive. Graduates in the cohorts covered by this report who have secured pupillage since 31 March 2018 will be included in the next publication.

Students may start pupillage up to five years after successfully completing the BPTC. These charts do not include pupils who either passed the BPTC prior to 2013 or were exempted, for example by virtue of having passed the Bar Transfer Test.

Full details of overall pupillage rates (including those who took alternative routes to pupillage) can be found at:

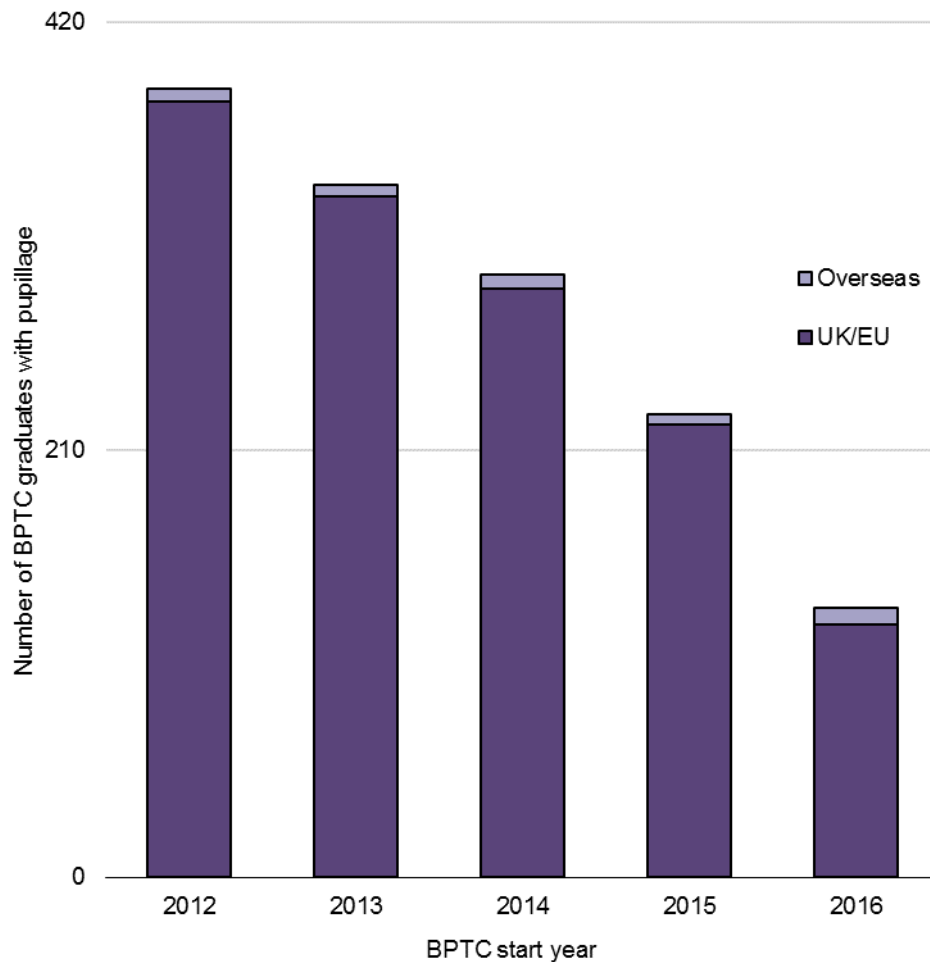

<https://www.barstandardsboard.org.uk/media-centre/research-and-statistics/statistics/pupillage-statistics/>

Not all students taking the BPTC will wish to undertake pupillage, or wish to remain domiciled in the UK. There are relatively few overseas domiciled BPTC graduates that have gained pupillage in the UK following completion of the course, and for this reason, the majority of the charts in Part 4 contain data on UK/EU domiciled BPTC graduates only. Of the BPTC graduates enrolling in the academic years commencing 2012-2016, 32 overseas domiciled BPTC graduates gained first six pupillage in comparison to 1347 UK/EU domiciled BPTC graduates.

## Appendix I: Anonymisation process

To protect the identity of individual students, data have been anonymised in line with recommendations and guidelines laid out in 'Anonymisation: managing data protection risk code of practice' (Information Commissioner's Office, November 2012).

A combination of the following anonymisation techniques have been carried out in order to prevent single individuals being identified from the data in the charts:

- y-axes in all instances only contain three values, in order to make it more difficult to ascertain student numbers and percentages for each chart element;
- some of the data have been aggregated, particularly sensitive demographic data and instances of small cohorts;
- as part-time cohorts are significantly smaller than full-time cohorts the number of charts have been cut down significantly and only one data table has been provided;
- by anonymising the data in parts 1-3, we have been able to leave some of the data intact in part 4 (the anonymisation of demographic data in the earlier parts of the report means that it is not possible to identify individuals in part 4 with any degree of accuracy);
- in the data tables found in the appendices, values have been banded automatically if they are fewer than 5 (< 5 is displayed), and fewer than 10 (< 10 is displayed);
- in a column, if only one value fewer than five or fewer than ten is present, then the next lowest value is banded to the next multiple of five, e.g. 110 becomes < 115, and 21 becomes < 25;
- totals in the data tables are not provided in most cases, particularly for individual providers;
- percentages are not provided in the data tables.

We have decided not to include in any graphs on student outcomes (Parts 1A, 2A, 3A, 4A and 4B) data in instances where there are fewer than 20 students in each overall cohort. For example, if the number of students from a certain provider with a first class degree is fewer than 20, it has not been included in the relevant chart.

This is to ensure greater validity in the data presented, as smaller cohorts are more likely to be affected by outliers in terms of student outcomes and can lead to misinterpretation of the data. This means that in many cases, data on individual providers are not found in a chart.
